PROFESSIONAL SUMMARY

Creative strategist and graphic designer who runs the intersection of scroll-stopping visual design and data-driven growth. As Founder/CEO of a social-media and design agency, builds complete digital ecosystems — not just content — combining a classic designer's eye with AI-assisted production workflows to deliver weeks' worth of premium creative in a fraction of the time. Specializes in "Strategic Simplification": taking complex, time-consuming creative and brand projects and delivering them fast without sacrificing quality.

CORE SKILLS

Design: Graphic Design, Visual Identity/Branding, Social Media Content Design

Management: Agency Leadership, Client Strategy, Creative Workflow Optimization, Team Direction

Marketing: Social Media Management & Growth, Content Strategy, Brand Storytelling

AI-Assisted Production: Prompt Engineering, AI Design Tooling, Rapid-Turnaround Creative Pipelines

Technical: Database-backed website builds, basic full-stack web development

PROFESSIONAL EXPERIENCE

Founder / CEO | *PixelVerse (Social Media Agency)*

Sept 2024 – Present | Sialkot

- **Pioneered proprietary design methodologies** that cut complex project turnaround times from several days down to a matter of hours.
- **Engineered strategic visual solutions** for highly complex design problems, consistently balancing best-possible aesthetics against ultra-tight client deadlines.
- **Optimized creative workflows** end to end — identifying bottlenecks in the design process and implementing unconventional, rapid-execution strategies without sacrificing output quality.
- **Transformed design operations** by operating as both strategist and executor: setting creative direction while personally delivering high-volume graphic production.
- Built and manage the agency's own brand presence and client-facing digital ecosystem, including a database-backed portfolio website.

FEATURED PROJECT

Brand & Web Ecosystem — PixelVerse

2024 – Present

- Designed and built database-backed websites and visual identities for clients, focused on assets that don't just look good but actively drive engagement and conversions.
- Used AI-assisted prompt workflows to condense project timelines by up to 90% while maintaining a premium, on-brand aesthetic.

EDUCATION

BS Computer Science | *University of Sialkot, Faculty of Computing and IT*

In Progress | Sialkot, Pakistan

- Combines a technical computing foundation with design practice — able to speak both the creative and development sides of a project.

CERTIFICATIONS

Prompt Engineering — Coursera

Dec 2023 – Jan 2024

- Certified in advanced prompt engineering using structured Prompt Patterns to automate creative and problem-solving workflows.
